

In the past few weeks, there are many interesting activities to be highlighted with our Buds One Class, Amanda and Ivy

Using recyclable materials and open-ended/loose play is our focus.

We did material collage on the CDs using fabric scraps, paper scraps and glitters, then we hanged these decorated CDs outside on the veranda as sun catchers. They shine under the sun and makes interesting patterns on the floor. We enjoyed catching the reflections and we had a competition with the children in Buds Two to see who can jump up higher to touch the sun catchers. This is so exciting!

The fishing game is also popular among the kids . This open-ended resource is mainly made of shoe box, colour paper, magnets and chopsticks. In this game, the children learnt to initiate sharing and negotiating; practised their hand-eye coordination. It also raised children's awareness of using recyclable materials.

Another interesting activity loved by the kids is making ice cream. We coloured the cotton balls with food colourings first ,then Miss Ivy helped us to cut out the pointy parts of the egg carton. We glued the cotton balls together. Tah-dah! Look at our master piece! There are different flavours of the icecream, such as mango, passionfruit, vanilla, sesame, and strawberry. Which one is your favourite?

Cooking experience is exciting, too! We made choc cookies and had them for afternoon tea. We love eating cookies, especially the cookies made by ourselves! Do you want to try some cookie made with love ? Come to Buds One ! We have plenty of love and fun here everyday 😊
